Generate PDF For All Custom Post

WP Ultimate PDF Generator plugin allows users to download posts, pages, products, into the PDF. These PDFs can also be printed or sent to a registered email address as per the requirements

Predefined Templates For Posts, Pages & Products

This plugin provides 3 predefined templates for posts, pages, and products. The layout will be adjusted as per the content on these pages.

Create Custom Header & Footer

This plugin also allows the admin to customize the Header and Footer of PDF. The admin can easily add the Site URL, LOGO, Description, and many more.

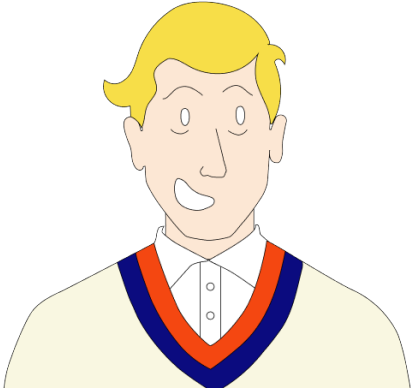

Watermark And Logo To Promote Brand

Add watermark as text or image to make PDF look more credible. This will help you increase your brand authority and avoid plagiarism at the same time.

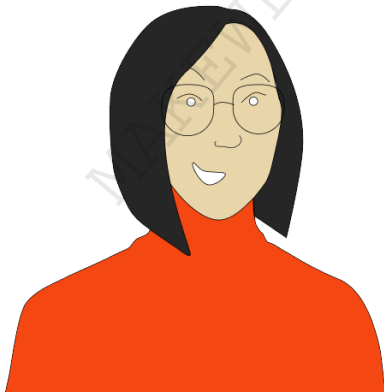

REVIEWS

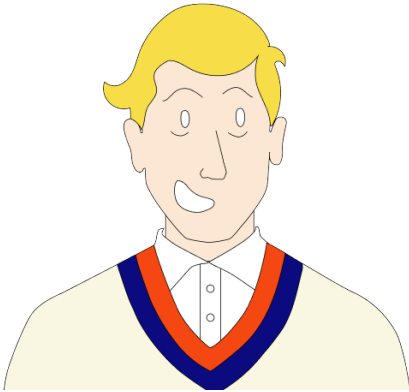

CONTACTDERRIK

I am really blown away by the support and the features that is in the .
I think i tried over 6 PDF generator plugins and this is no doubt the best in the market.

HIROSICHEN

I tried to find PDF Generator for a long time in codecanyon market. This is exactly the plugin for those who want to automatically generate PDF in profession way on WP.

WEBMASTERGRAM

Very good support and easy to use. The support team is very good and reactive. If you want a plugin to export your data in PDF from the back office of your wordpress website. This is the one you need.
